

M1.1.c: Python Environment Setup

Python2 in Ubuntu

- To check whether Python2 is installed or not (Ubuntu)

```
python --version  
or
```

```
python -V?
```

- if already installed, then its version will be displayed.
- When you type python in the terminal, get the output like this:

```
Python 2.7.6 (default, Mar 22 2014, 22:59:56)  
[GCC 4.8.2] on linux2  
Type "help", "copyright", "credits" or "license" for more information.  
>>>
```

- Python 2 is installed by default on modern versions of Ubuntu; if you don't have:

```
sudo apt-get install python?
```
