

M1.1.c: Python Environment Setup

Python3 in Ubuntu

- To check whether Python3 is installed or not (Ubuntu)

```
python3 --version?
```

- if already installed, then its version will be displayed.
- When you type python3 in the terminal, get the output like this:

```
Python 3.5.2 (default, Jul  5 2016, 12:43:10)
[GCC 5.4.0 20160609] on linux
Type "help", "copyright", "credits" or "license" for more information.
>>>
```

- Python 3 is installed by default on modern versions of Ubuntu, if you don't have:

```
sudo apt-get install python3
```
