M1.1.c: Python Environment Setup

Interactive Mode - Primary & Secondary Prompt

When commands are read from a tty, the interpreter is said to be in***interactive mode***: In this mode it prompts for the next command with the ***primary prompt***, usually three greater-than signs (>>>); for continuation lines it prompts with the ***secondary prompt***, by default three dots (...). Continuation lines are needed when entering a multi-line construct.

Files containing python programs have .py extension.

To run a python file named sample.py :

```
>>> python sample.py
```
